**BUILDING THE BEST
FAMILY BOATS IS SIMPLY A
MATTER OF TRADITION**

Byron Smoker
Byron "Barney" Smoker

SMOKER CRAFT

We're all familiar with entertainers for whom performing is a family tradition. Though we at Smoker Craft may not sing or dance very well, we understand the family tradition part perfectly. As America's First Family of Boats, building family boats is a tradition we're proud to continue.

Families figure into everything we do, from our business philosophy to the boats we build. We design our boats to be as safe and family-friendly as possible, because we want your entire family to enjoy them as much as we do.

You'll find everyone has room to stretch out or haul in a prize catch, because there's plenty of space inside your boat. Comfortable, movable seats make it easy for you to find your favorite spot to enjoy the view. And, even with the whole crew on board, there's more than enough storage space for all your gear.

Your Smoker Craft boat is also a visual treat. The vivid colors and stylish graphics create a warm, contemporary look that will make you feel right at home. The interior, with handsome Alpha carpeting throughout, is both easy on the eyes and easy to clean.

What you don't see, though, is just as important to your family's safety and enjoyment. Like tough, rugged hulls for years of faithful dependability. The same double riveting process used in airplane construction for greater stress-flex

and durability. Five keels for longitudinal strength and better control. Up to 13 ribs for lateral strength. Floors made with specially treated wood for long-lasting protection.

We also send each boat through a demanding inspection process to ensure it's built right and built safe. For example, our boats are thoroughly leak tested, and our level flotation tests meet or exceed the required federal levels. Most importantly, we back our boats with a comprehensive 10-year limited warranty to give you and your family complete peace of mind.

For over 30 years, it's been our family tradition to build a complete line of top-caliber, affordable family boats. We've been pretty successful at it because we pay attention to what families want and need in a boat.

We've remained an independent, family-owned company because it allows us to build boats you can enjoy, not what someone thinks you'll enjoy. And since our family name is on each one, we work harder to make sure they're built right.

From the practicality of recirculating live wells, to the graceful elegance of our curved windshields, you'll find Smoker Craft boats fit nicely into your own family tradition of boating enjoyment.

And that's a **TRADITION** we're happy to continue.

CUSTOM-MOLDED CONSOLES

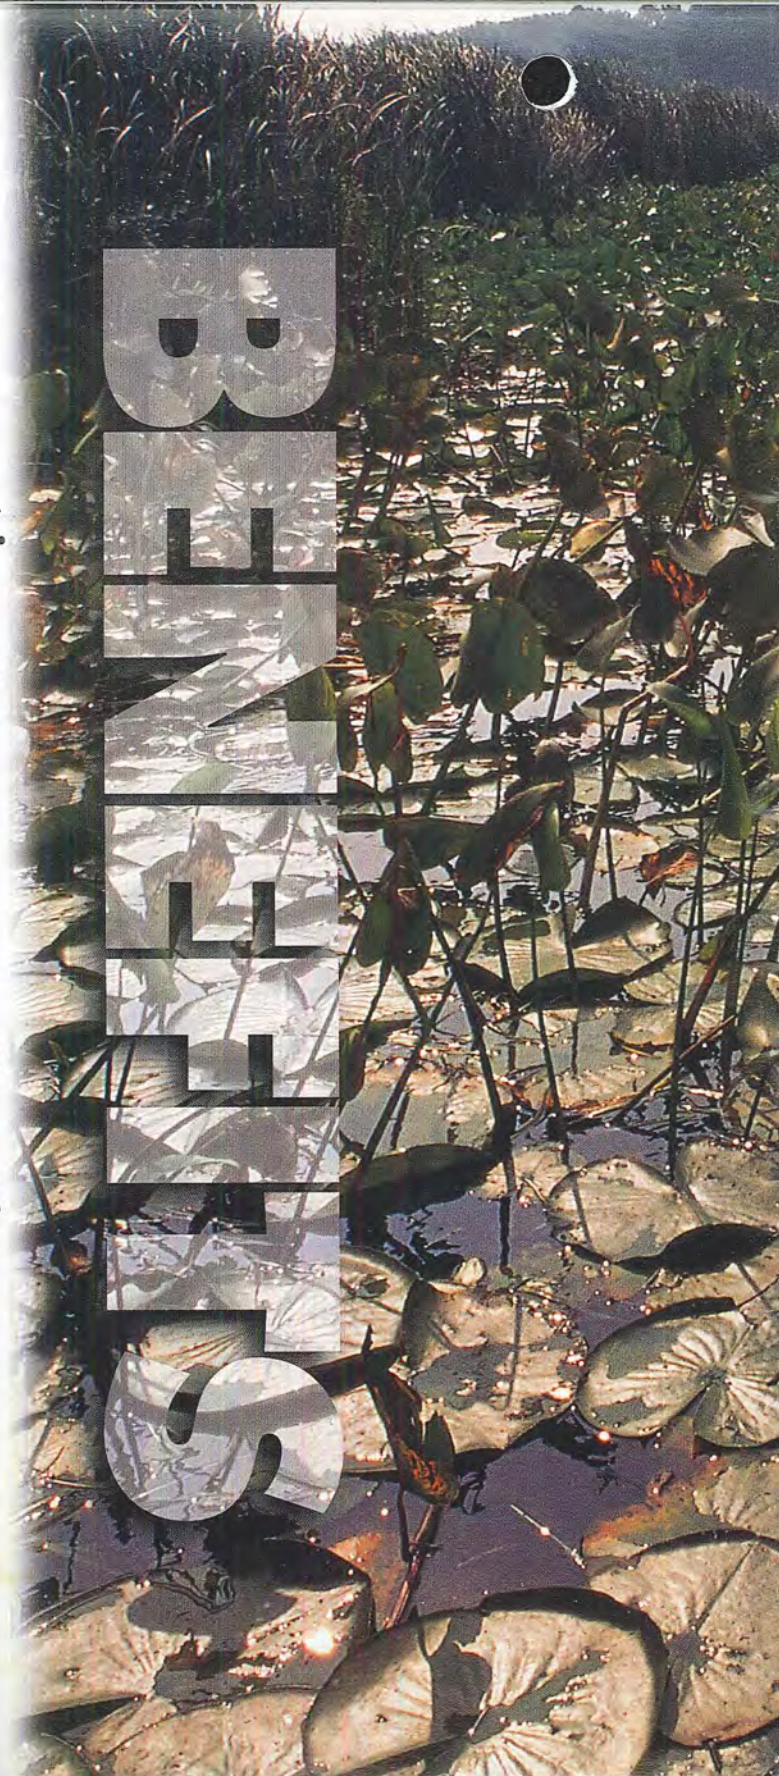

With elegant teak accents, the contemporary look of the custom-molded consoles complements their smart design. A simple glance at the domed Teleflex gauges on the dash lets you easily monitor your boat's performance. Switches and circuit breakers are all right at your fingertips. There's room for extra electronic gear, and you can bring along your favorite fish-catching music to play on the AM/FM stereo-cassette. On dual console models, you'll also find a lockable glove box, molded cup holders and other amenities.

STORAGE, STORAGE, STORAGE

No matter how much stuff you bring along when you go boating, you'll find the storage space you need. There's plenty of room for fishing gear, safety supplies, picnic items, beach towels and anything else you and your family want to bring along to add to your fun. Up front, along both sides, in the consoles, in the rear – storage space is everywhere you look. And for extra protection, most of our storage compartments are lockable.

We pack plenty of features into each Smoker Craft boat, and their benefits ensure you'll get the best boat for you and your family. Some you can see, and some you can't, but they all provide you with a well-built, comfortable and safe boat you can enjoy for years and years. Here are just a few reasons why, inside and out, from construction features to convenience features, Smoker Craft boats are the best built family boats you'll find.

Best Boats

PUSH-BUTTON CONVENIENCE

With a Smoker Craft boat, you won't be stuck in choppy water, fumbling to replace a blown fuse. You'll find circuit breakers for your electrical systems conveniently located on the dash. Simply press to reset, and you can go back to trying to remember where you found that exceptional fishing spot.

A WORK STATION THAT'S A PLEASURE

Fishing is a pleasurable activity, and you'll find it even more so with the rear work station in your Smoker Craft boat. In larger models, you'll find an extra seat base to create a comfortable rear casting platform. There's also storage space for your gear, and a live well to hold your trophies. All this extra room comes from reducing the splashwell and installing a built-in gas tank, which is double-vented for your convenience.

The benefits of your **SMOKER CRAFT**...

HAVE A SEAT

You'll notice right away how comfortable the seats are in your boat. We make all our own seats, starting with thick, resilient foam padding that won't go soft, so you can enjoy years of relaxing support. The high grade marine vinyl covering is both attractive and easy to clean, giving you a "just bought it" brightness season after season. And to protect the hands of your crew, we install pinch-proof hinges on every seat.

NEW LOOK DOORS

The clean, smooth look of the interior comes from carpeted, aluminum storage doors replacing most Tempress doors. Aluminum gives each door greater strength and durability. And by covering the doors with carpet, your boat keeps its showroom beauty longer. For your convenience, nearly all rod storage compartments have bi-fold doors.

CHECK IT OUT

Boating is more fun when you operate under safe conditions. To help keep you and your family safe, look this list over each time you're planning to go out on the water, and make sure everything is OK. While you're out, the diagram at the top serves as a helpful reminder of the "rules of the road." By making everyone in your family aware of the importance of safe boating, you'll get more enjoyment and satisfaction every time you step into your Smoker Craft.

SMOKER CRAFT

KEEPING AN EVEN KEEL

You'll enjoy safer, smoother performance and control from the external keels on the bottom of our hulls. We install up to five keels to give you increased maneuverability when cornering, better control on windy days, and protection from unseen submerged objects. The keels provide stability and longitudinal strength for your boat, and peace of mind for you.

A SOLID FOUNDATION

Your boat's superb strength and performance start with our seamless, one-piece bottom, which provides increased hull integrity.

Our rock-solid rib structure features .100 gauge, hand-fitted ribs on approximately nine-inch centers for incredible lateral strength and rigidity, plus up to eight additional ribs backing up our rugged hull.

With this foundation, your boat will easily handle all kinds of water.

...are among its best features

WE'LL LEAVE YOU HIGH AND DRY

You'll enjoy the driest ride on the water with our flared, rake-back bow design. "Sharp" is the word that comes to mind, both in the way the bow looks and how it cuts through water, shooting the spray away from your boat so you stay dry, no matter how choppy it is. You and your family will appreciate how the built-in spray rail keeps you dry each time you go out. In addition, our gunnel design includes an extended lip that also keeps spray out of your boat.

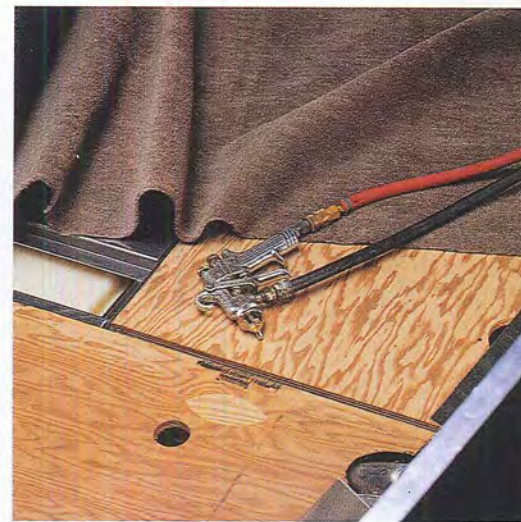

SUPERIOR INTERIOR

Long-lasting beauty and strength are right under your feet. We build our floors with XL-10 plywood, specially treated so it won't warp or rot to give you years of maintenance-free enjoyment. Then we cover the wood with thick Alpha carpet, highly prized in the marine industry for being both rugged and luxurious.

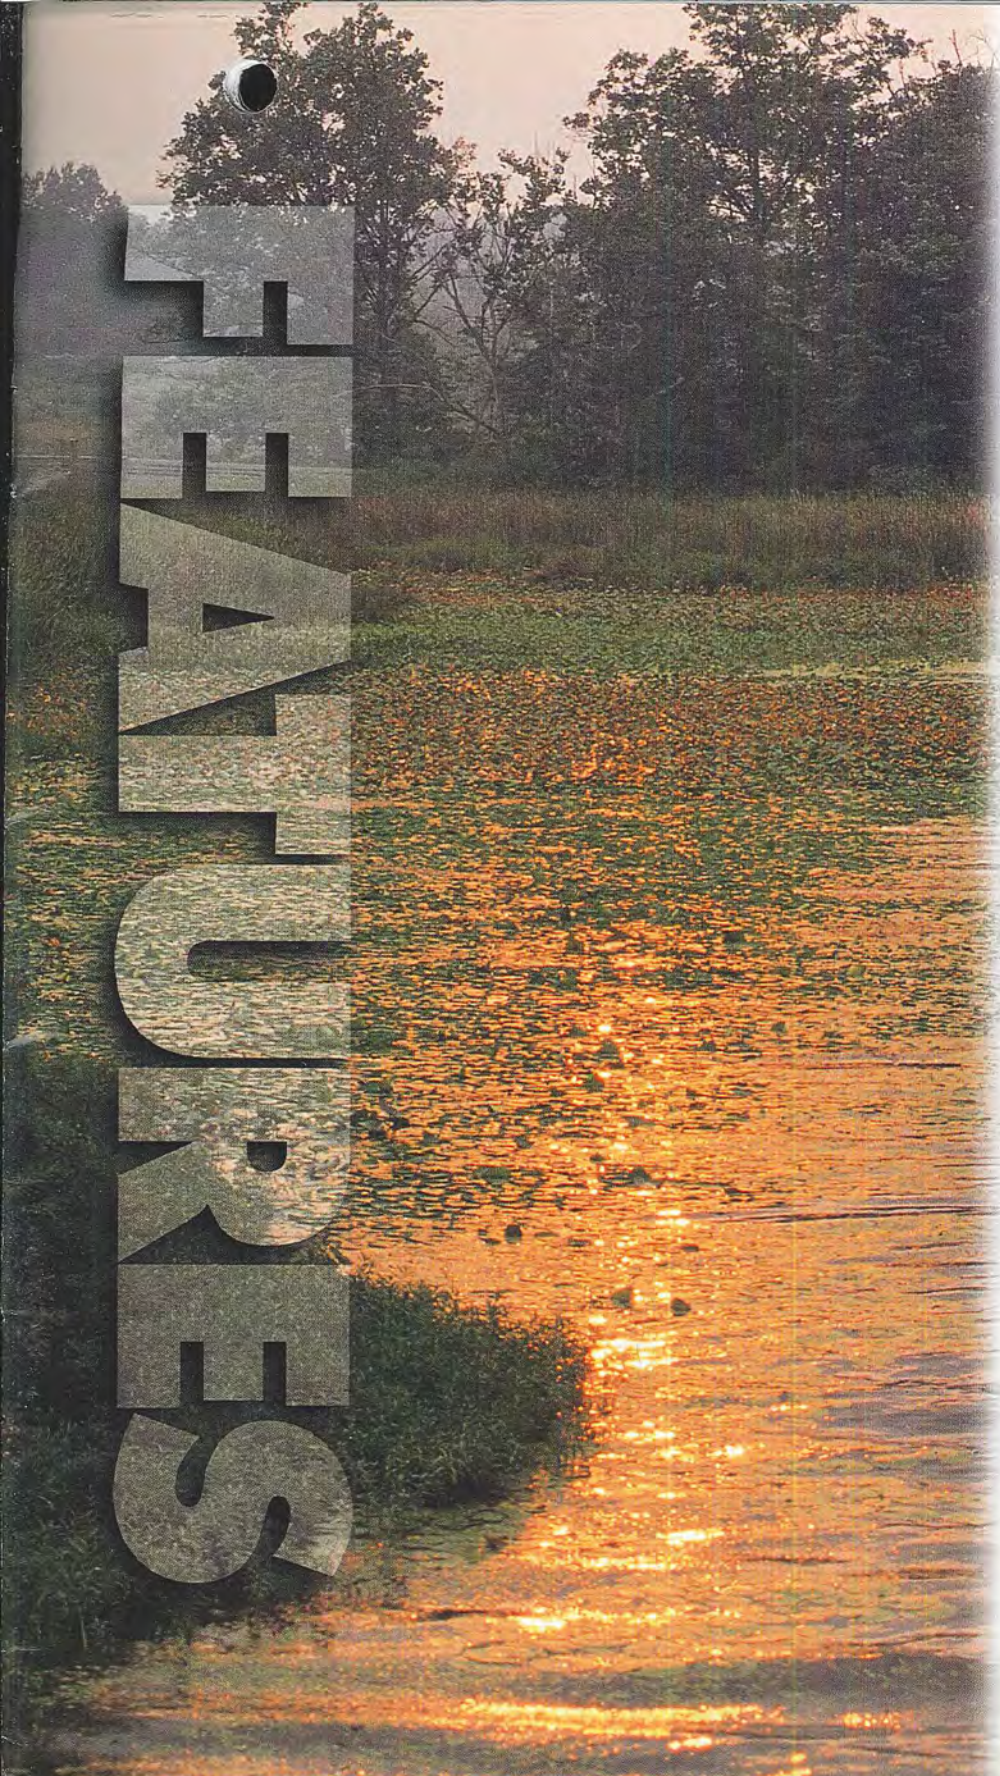

The Champagne color enhances your boat's attractiveness because it hides dirt much better, and is easy to clean. It also comes with a five-year warranty for added security.

POUR IT IN

Under the floor of nearly every boat we make is poured-in, gasoline-resistant urethane foam, ensuring you of maximum buoyancy and strength. The foam is applied after the floor is laid down, not before, to prevent water-collecting pockets from forming. You'll also be able to hear the fish trying to sneak away, because the poured-in foam deadens sound, eliminating creaky floors.

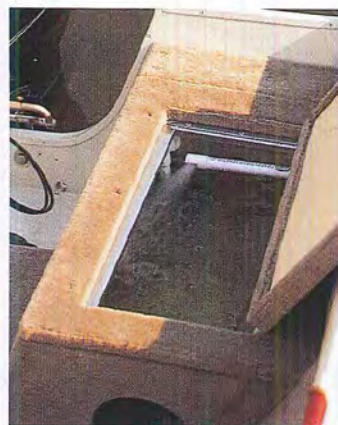

WE'VE GOT YOU COVERED

WE'RE ACCESSIBLE

You'll find it easy to replace hoses and make minor adjustments with the large access plates located in the transom and the bow area. Simply lift them out, and you've got plenty of elbow room to keep everything in "shipshape" condition.

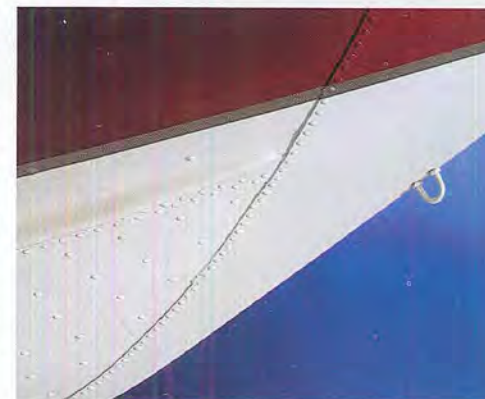

KEEP 'EM LIVE AND WELL

The fish won't mind getting caught when you put them in one of the spacious, aerated live wells you'll find in your Smoker Craft. With timers and recirculating pumps, your fish will be cleaner and healthier...so important whether you're practicing catch-and-release or bringing home a tasty cookout treat. Foam-backed lids provide superb insulation. Most models come equipped with the Flow Rite Live Well System to keep the live well even fresher. For your convenience, control switches for the live wells are both on the dash and on a panel close to each live well.

BAKED TWICE TO STAY NICE

Your boat's hull will keep its brand-new good looks for years and years because it's painted with a twice-baked urethane finish. Durable and scratch-resistant, the urethane paint helps increase the toughness of our hulls, including the bottoms, while the depth of color provides a long-lasting showroom appearance.

- Dual or Hydraulic Steering • Extra Seats • Side & Aft Curtains • Bow Covers

SMOKER CRAFT

PRO TILLER / STILLETTO

Two good ways to catch more fish

PRO TILLER

SMOKER CRAFT

Either one is the right choice for fishing success. You can fish comfortably in any water, thanks to their deep "V" hulls and high sidewalls. You'll be in control of your favorite spot with the generous front casting platform of the Pro Tiller. The Stilleto cuts sharply through the water to let the fish know you mean business, and dual and single console models make it easy to fit your style. Built-in gas tanks, lockable rod storage, movable seats and plenty of storage make the Pro Tiller and the Stilleto two of the best pure fishing machines you'll find.

160 PRO TILLER STANDARDS

Vinyl Padding on Gunnel • 3 Bass Seats (2 Movable & 1 Stationary) • 3 Seat Base Locations • Dual Lockable Rod Storage • Built-in 20 Gal. Gas Tank • Lockable Bow Storage • 21 Gal. Aerated Live Well • Live Well Features Built-in Timer System for Manual or Auto Use • Deluxe Instrumentation with Speedometer, Tachometer, Volt and Gas Gauges • Trolling Motor Plug • Circuit Breakers with Switches • Courtesy Light • Bow & Stern Battery Trays • Treated Floor • Marine Carpet • 4 Cleats • Bottom Gauge .080 • 5 Keel Construction • 8" Transom Access Plate • 8" Plumbing Access Plate in Bow

ALASKAN

How the west was really

12' Standard Alaskan

14' Split Seat Alaskan

von

14' Standard Alaskan

15' Split Seat Alaskan

Named for the last untamed wilderness, the Alaskans are the boats to turn to when you've got a fishing spot that needs to be broken in. They're no-nonsense, no-frills explorers that are always up to any challenge. Split seat models come with storage compartments, vinyl covered floors and a front platform; and you'll find the sturdiest bench seats around in our standard models. All are easy to clean and easy to haul, and they make the fishing easy, too.

15' & 14' SPLIT SEAT STANDARDS

Seat with Gas Tank Storage • Rod Holders • Aluminum Bench Seating with XL-10 Plywood between Foam and Aluminum for Easy Mounting of Swivel Seats • Bow and Stern Castings with Grab Handles • Bow Eye • Lockable Side Storage Seat Boxes • Vinyl Covered Front Deck Tray • Full Vinyl Covered XL-10 Pressure Treated Plywood Floor and Transom Board

SMOKER CRAFT SPECIFICATIONS

SMOKER CRAFT

What could be more special, and fill us with more pride and contentment, than watching our families grow?

Whatever happiness our own lives may bring, nothing will be so precious, so fulfilling, as the deep, heartfelt joy of seeing our children become adults.

And when they've grown and become parents themselves, we watch the grand cycle continue from a new perspective, one of wisdom and hard-won experience. We continue to offer guidance to our own children, and we also provide their children with priceless insights so they, too, may learn about life and family... Just as we learned from the generations before us.

As you know, families mean everything to us. We couldn't imagine running our company any other way except as a family. It serves as a constant reminder of the importance of building affordable family boats that are safe, dependable and long-lasting.

For over 30 years, we've watched with great satisfaction as our small family company grew steadily into one of the leaders in the boating industry, growth accomplished with the wisdom and experience gained over time.

We've also watched as our families have grown during that time, the generations blending easily with one another, the insights of the years shared and treasured. Just like the pair you see here admiring our new 170 Phantom: company founder Barney Smoker and his grandson, Tim, son of our vice president, Doug Smoker.

Family. That's what we are, what we all are. And that's the greatest accomplishment of all.

America's First Family of Boats
