

BETTER FISHING, FROM OUR FAMILY TO YOURS.

For over 50 years, our family has been dedicated to building aluminum fishing boats that deliver great experiences for all types of anglers. Our innovative hull designs lead the way in hole-shot performance, handling and ride quality. And our commitment to excellence means you can count on a Smoker Craft for best-in-class quality and reliability. Most importantly, we offer feature-packed models to fit every budget, so you can be sure there's a Smoker Craft that's right for you.

FOUR FOUNDATIONS FOR BETTER FISHING.

Smoker Craft boats are built by fishermen, for fishermen. We know what's important to a great fishing experience, and we take those things to the next level. Take a few minutes and learn what makes Smoker Craft best in class when it comes to aluminum fishing boats for every budget.

1

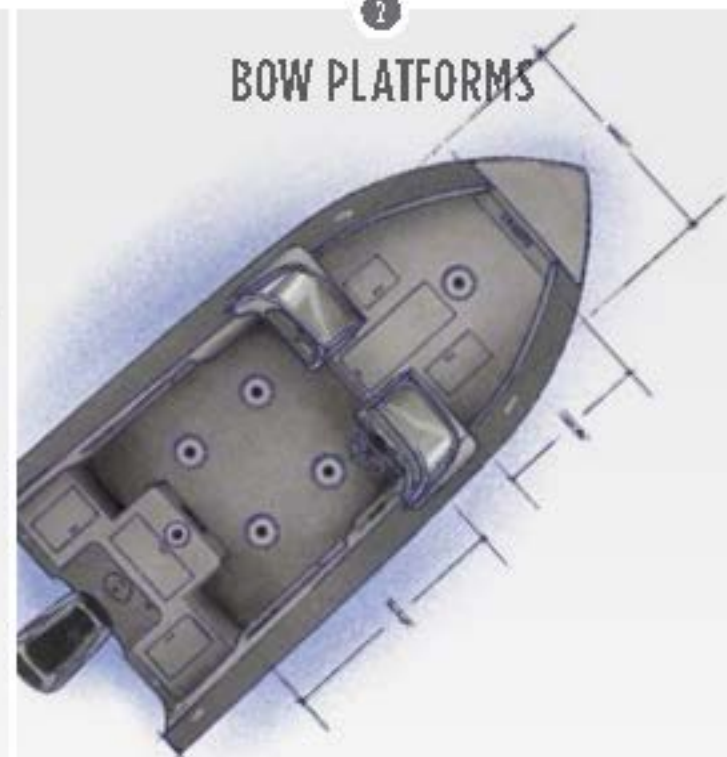

LIVEWELLS

Most Smoker Craft models feature the state of the art Flow Rite livewell system. This exclusive design continually draws in water and provides circulation and aeration to help protect your catch. Then, at the end of the day, it drains through the transom for easy tank cleaning.

2

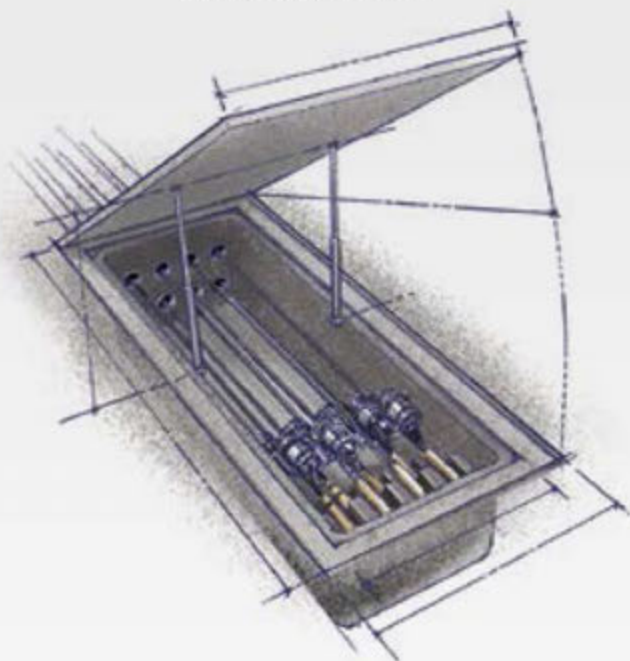

BOW PLATFORMS

Our exclusive raked back bow provides for wider beams and large, open casting platforms. Flush in floor storage and livewells give you unobstructed space for maneuvering. And the enhanced interior depths of our deep V hulls provide added safety in rough conditions.

3

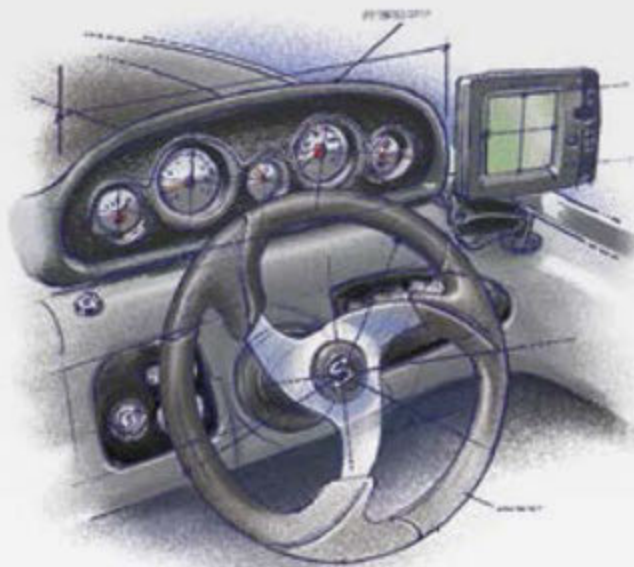

ROD STORAGE

Our rod storage spaces are designed to give you the ability to take and easily access all your favorite gear. Select models feature lockable bow in-floor center storage that safely stows up to 8 rods.

4

CONSOLES

Smoker Craft deluxe consoles are inspired by sports car styling and are ergonomically designed for a better experience at the helm. Select models feature a full array of fog-free gauges, hydraulic steering, lighted rocker switches, and space to conveniently mount a sonar unit.

THE INDUSTRY'S BEST WARRANTY. PERIOD.

Only a company with the proven history and longevity of a brand like Smoker Craft can offer something like this:

- Limited lifetime warranty on hull and structure
- 6-year warranty on all components, carpet, upholstery, and electronics
- All parts and labor
- Transferable to second owner

See dealer for details.

When you get a Smoker Craft, you can be sure you're getting a boat that carries the pride of our family name, using the finest materials, state of the art equipment and quality workmanship. From hull design and construction down to the last factory installed feature, we continually strive for best in class to give you a boat you and your family will take pride in for years to come.

PROUD TO SHOW YOU WHAT WE'RE MADE OF.

TRANSOM

The transom board is made of 15" pressure treated plywood which is covered by our Limited Lifetime Warranty. The board is sandwiched between the aluminum transom and a second aluminum sheet and anchored using stainless steel bolts.

SIDE PANELS

The side panels are strengthened by rolling lapstrakes into the aluminum, adding rigidity to the sides that prevents the "oil can" appearance of many other boats.

PERFORMANCE HULL SYSTEM (PHS)

Our exclusive Performance Hull System is a completely customizable trim tab feature that increases speed, reduces pounding, eliminates porpoising and provides improved efficiency with less fuel consumption and engine laboring. The system allows you to tune your hull to maximize performance, depending on the weight and horsepower of your engine. Additional benefits include improved visibility, reduced wake size, better handling and less hull stress.

Hydra-Lift
performance hull

HYDRA-LIFT REVERSE CHINE HULL

Our exclusive high performance hull provides superior lift to get you out of the hole and on plane quickly. The reverse chine design keeps the bow down during acceleration, provides sports car style turning agility and offers exceptional stability both while running at high speeds and while at rest.

SPRAY RAIS

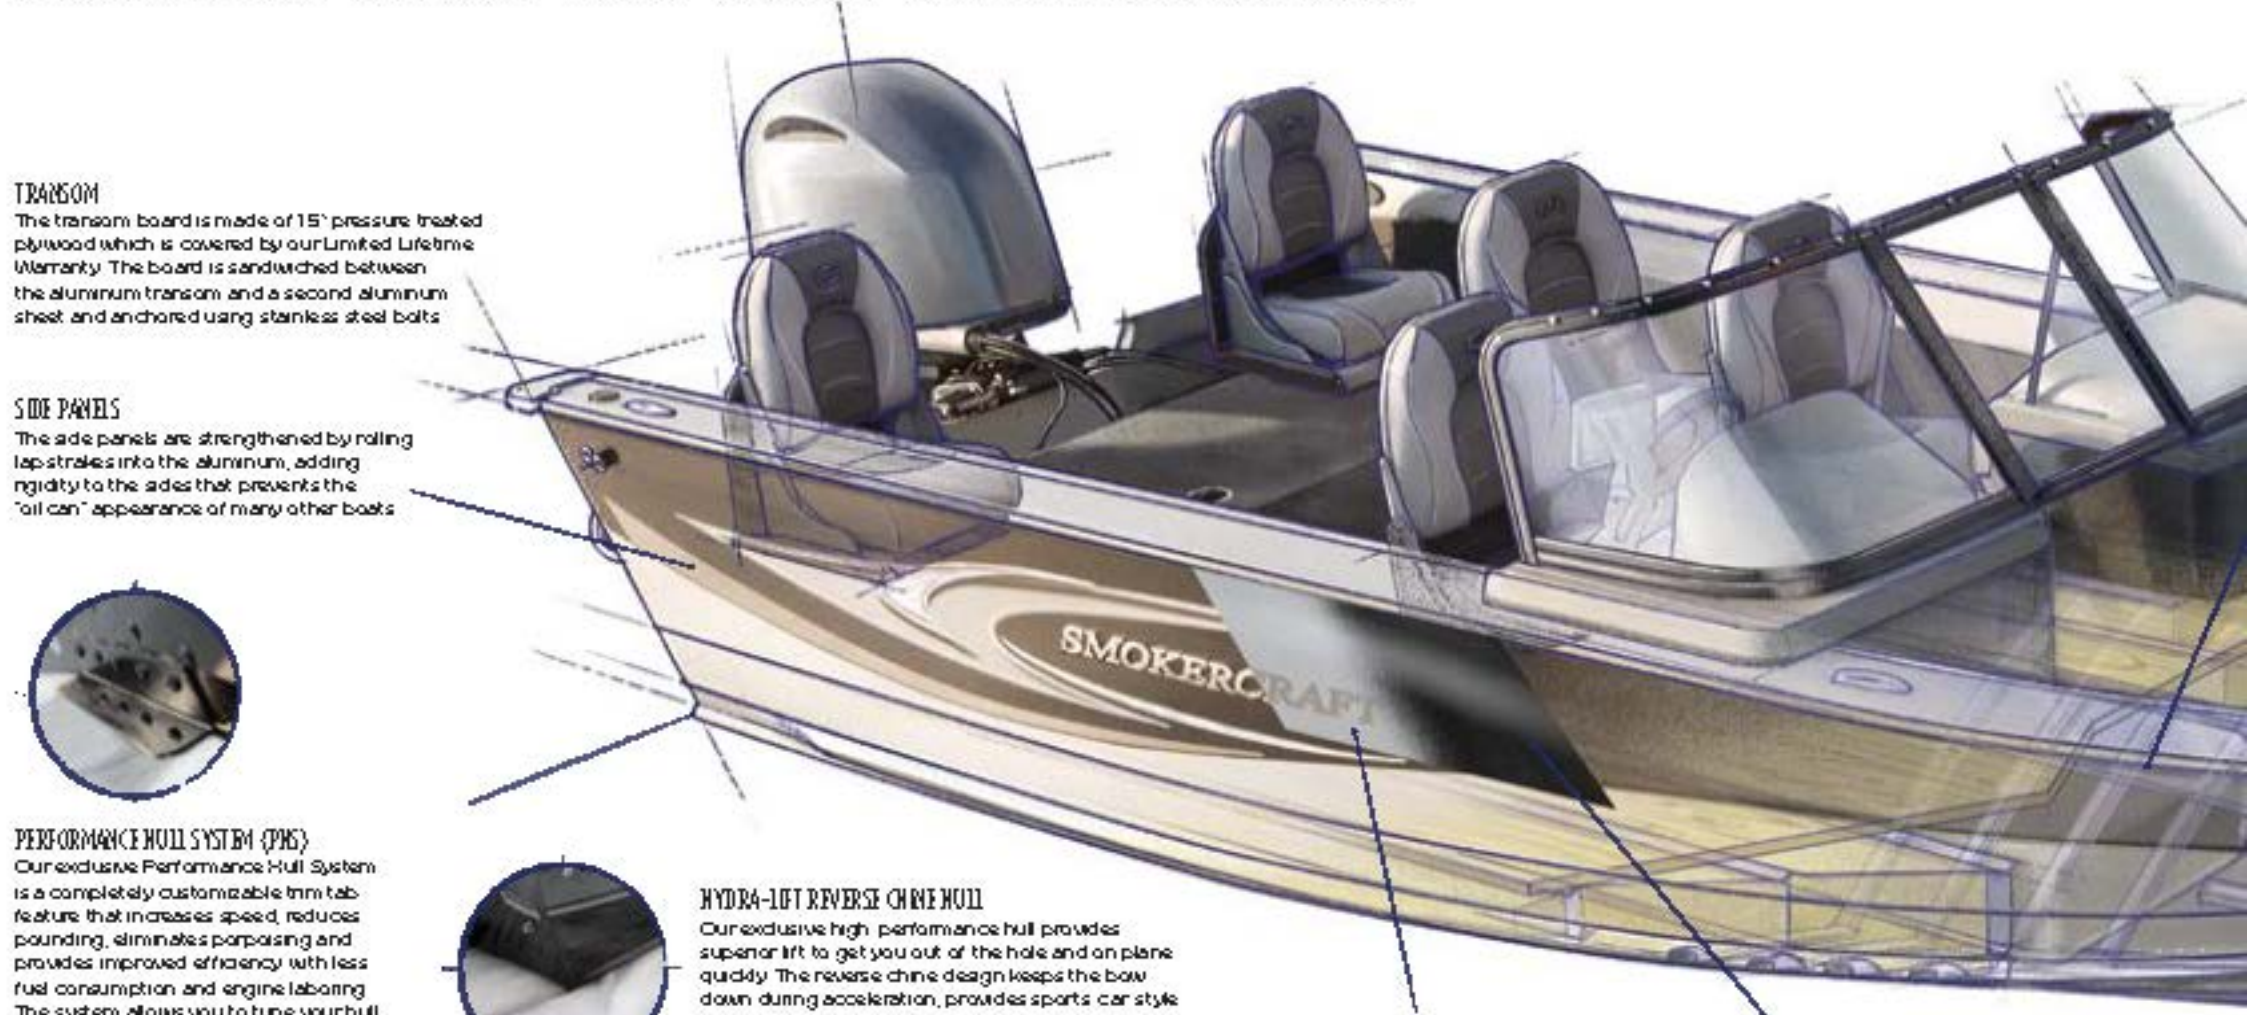

Spray rails are rolled into the side panels, giving a much cleaner appearance and eliminating the line breaking rough edges found on many other boats. The combination of spray rails with the Hydra Lift reverse chine design delivers the finest ride in the industry.

ZINC CHROMATE PRIMER

The hull is sanded to prepare it for painting, and in the primer booth it is sprayed with a zinc chromate primer that chemically etches into the aluminum and forms a corrosion resistant surface. This also creates an even, bondable surface for the final paint layer.

TWICE-BAKED PAINT FINISH

Smoker Craft boats are sprayed with 3 coats of base urethane paint and baked in a large oven for 20 minutes at 180 degrees. The hull is then masked off and the boat enters the accent stripe paint booth where it is sprayed with 3 coats of accent color. The boat then runs through a bank of infrared heating coils, giving it a twice baked, diamond hard finish that is resistant to chipping and fading and will look great for years to come.

CONSTRUCTION YOU CAN COUNT ON.

GAS TANK INTEGRATION

We place the gas tanks below the floor toward the center of the boat between the floor stringers to centralize the weight of the fuel. This gives the boat a softer ride and helps keep the bow down.

NEXT GEN HULLS

Smoker Craft's next generation hulls (on select Pro Angler and Ultima models) feature a longitudinal stringer system for internal support, instead of cross ribs. The stringer system is welded together in a jig to ensure proper alignment and is riveted to the hull bottom to create a uniform hull structure.

AIRS

The Hydra Lift Hull is supported by Smoker Craft's exclusive Advanced Integrated Rib System (AIRS). This integrates heavy machine formed hat shaped ribs in the bow with cross ribs on 10" centers on the bottom. The bow ribs conform to the contour of the bow and angle toward the cross ribs to add strength to the critical area of the hull when the boat is running. Floor stringers are fastened to the cross ribs to support the floor panels and enhance hull strength.

AIRS

5-KEEL CONSTRUCTION

While many manufacturers have stopped adding keels, we continue to use up to 5 keels on our hulls to provide longitudinal strength and protect the bottom when beaching or trailering. In addition, the keels help the boat plane quickly by breaking the water during acceleration. They also improve tracking and help hold position while fishing.

ONE-PIECE BOTTOM

The Hydra Lift Hull begins with a one-piece bottom, unlike many other manufacturers. Aluminum gauge ranges from .100" to .125".

UPHOLSTERY

All Smoker Craft boat upholstery is produced in-house to better control quality and conform to new boat designs. Each piece is precision cut using computerized routers, and we use only stainless staples and non-corrosive fasteners. Our cushioning foam is biocide treated to help prevent mildew and the growth of fungal organisms that can discolor the vinyl. This is a key step to protecting the upholstery that many manufacturers overlook.

CARPET & VINYL

Smoker Craft boats use a combination of marine grade carpet and vinyl on the floor and side panels. Casting platforms and decks are covered in carpet that is both glued and stapled, while the cockpit features vinyl because it is easier to clean after a great day of fishing. Optional snap-in carpet can be added over the vinyl for added comfort when not fishing.

FLOOR PANELS

Our pressure treated plywood floors are 5/8" in the cockpit and 3/4" on the casting decks. They carry a lifetime warranty and will not warp or rot.

DIRECTED FOAM FLOTATION

Unlike other manufacturers, we inject foam flotation into pre-routed holes in the floor panels to fill the entire cavity under the floor. The adhesive property of our foam allows it to bond to both the floor panels and the hull providing enhanced support and excellent sound dampening.

HIGH-GRADE ALUMINIUM

Smoker Craft boats start with 5052-H34 Cold Rolled Aluminum for its superior strength, hardness and corrosion resistance. Computerized fabrication equipment delivers precision components and ensures consistent quality.

DOUBLE RIVETS

The sides and transom are riveted with a double row of airplane style rivets on the seams on all models T7 and above. The rows are offset to completely seal the seam.

WHEN IT'S TIME TO GET SERIOUS.

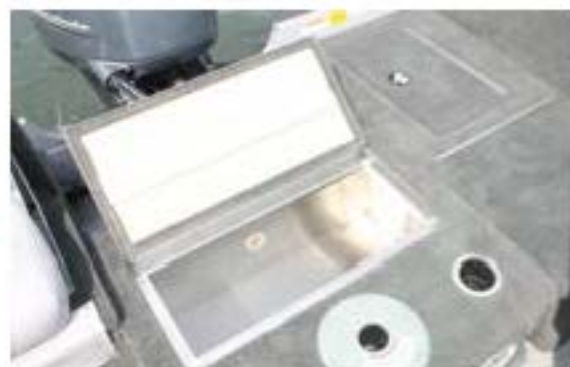

When you're ready to get serious about fishing, step up to the leader. With its deep cockpit, durable vinyl floor and raised front and rear casting deck, Millentia is versatile enough for everything from shallow weed beds to flowing rivers to big water. Built on the exclusive Hydra Lift rolled V hull, Millentia delivers wave taming performance, dry rides and unbeatable handling. And with oversized, aerated and recirculating live wells, locking rod storage, reinforced gunwales for downriggers, and deluxe fishing seats, you have everything you need to fish like a pro.

VERSATILITY TO THE MAX.

If you're looking for a boat that's versatile enough to let you fish a tournament in the morning and tow your favorite skiers around in the afternoon, Ultima is the right choice for you. Because when it comes to combining serious fishing and family fun, this boat stands alone. Serious anglers love the Ultima's two huge aerated livewells, top load rod racks and deluxe movable fishing seats with six bases. And you can kick the fun into high gear with large storage space for all your gear, a fully loaded deluxe console and an optional ski tow.
